Online Program

A Coordinated Training Concept

The requirements for instrument reprocessing and related processes are becoming more and more complex. To be able to identify and recognize the correlations in the manifold processes and workflows - paired with a great deal of expertise – is an important prerequisite to making the right decisions in our daily work and maintaining the high level of quality of work in the RUMED. That takes a high level of technical and procedural knowledge. We see it as our task to impart this knowledge.

The two companies KLS Martin Group and MMM Group form an ideal team to train and instruct you in all aspects of instrument application and instrument processing, which are the most important modules in the sterile goods management.

Benefit from our competence in save instrument reprocessing - from the point of processing in the RUMED to the point of use in the OR and back.

Get Fit for Your Daily Work

We want to impart knowledge and expertise to your daily work in the RUMED. Our courses are based on the contents of the DGSV and HSPA courses.

The courses are held by international experts with many years of experience in the field of application in the OR and instrument reprocessing.

Our Online Training Program

The RUMED Academy offers a two-level system in different international regions and languages. All courses are held in English language (except Latin America)

Information on courses, dates, venues, and direct registration, please visit: www.rumedacademy.com

Reprocessing Technician RUMED (Level 1)

The target group is RUMED manager, RUMED technicians, and other employees in RUMED with good English/Spanish language skills and practical experience in a reprocessing structure for medical devices.
